FORM B: DESIGN REVIEW APPLICATION CHECKLIST (Continued)

I (WE) UNDERSTAND AND AGREE THAT:

No work on any improvement described on my Design Review Request Form shall commence until written approval of the Design Review Committee has been received. Proposed improvements may require a permit from the City Building Department or other government agencies and Owner will obtain all required permits before commencing any work. No work will change the existing drainage patterns. Any changes in the existing drainage pattern may result in substantial damage to adjacent properties, for which Owner will be held responsible. The conditions and restrictions noted in the Design Guidelines and Declaration shall apply to any approval.

I (We) assumes the responsibility for any work, including conformity of completed improvements to the Plans and Specifications as approved by the Board or the Design Review Committee and the satisfaction of any time limitations for their completion as may be specified in conjunction with such approval under the above proposed modifications/improvements.

Further, I (We) assumes full responsibility for any work and that any contractor accomplishes which may, in the future, adversely affect adjacent properties and/or Association Property. I (We) will assume responsibility for all future maintenance of the modifications and/or improvements. I (We) shall complete all improvements within six (6) months of approval, other than the initial landscaping for the entire rear lot, which must be completed within twelve (12) months of Close of Escrow.

I (We) understands that prior to commencing any work Owner must provide a fee to the Association as set forth in the Design Guidelines.

The Design Review Committee conducted the Final Inspection by:

Reviewing the Owner submitted photographs Conducting a site visit

The Design Review Committee recommends the following:

- APPROVED: Final inspection is complete, and the Improvements are in substantial conformance with the approved plans and the Design Guidelines.
- DISAPPROVED: The Improvements are **not** in substantial conformance with the approved plans, specifications and/or Design Guidelines. The Applicant must complete/modify/remove the items noted below. After all items have been corrected, re-submit to the DRC for final approval.

DRC Authorized Representative Signature

Date

Improvements to be removed or modified by Owner:

If no Improvements must be removed or modified, insert "None."

TOURNAMENT HILLS COMMUNITY ASSOCIATION DESIGN GUIDELINES – FORMS

FORM E: WATER QUALITY MANAGEMENT BEST PRACTICE GUIDELINES

In order to mitigate the potential water pollution concerns associated with human habitation, the California Water Quality Management Board has set strict guidelines for the Community regarding the effects of runoff and storm water pollution.

One of the most sensitive and carefully monitored phases of the Community is the construction period. The requirements are not merely restricted to the development and construction managed by the Community's builder – construction by Owners will also be scrutinized and subject to very severe fines.

To be certain that you understand and accept responsibility for any violations associated with your proposed Improvements; each Owner is required to review this section. It must be signed and returned by you as a required part of your application submitted to the DRC. You must also make a copy for and provide this document to any contractors or consultants whom you employ to ensure their compliance with these requirements, and you should make them responsible for any fines which you may incur as a result of their violation of same. The Association will monitor construction activities as well as check on Best Management Practices; however, the Owner will be solely responsible for any fines incurred by the Association as a result of infractions initiated at Owner's Residence. The Association will take whatever legal action is necessary to ensure compliance and collect for infractions charged to the Association as a result of Owner's, or Owner's contractor's or consultant's, acts or negligence or failure to comply with these requirements.

The following requirements are not meant to be all-inclusive of Regional Water Quality Control Board requirements or of any other agency. It should be understood that any applicable agency's rules and requirements may/will be applied to the activities of any Owner and may supersede these Guidelines. All resulting fines imposed on the Association, or the Owner as a result of any violation of Applicable Laws will be the responsibility of the Owner and the Owner shall indemnify, defend and hold harmless the Association from any such fines or penalties incurred as a result of any violation by Applicable Laws, including without limitation any guidelines or restrictions provided by the California Water Quality Management Board.

1. No construction materials, chemicals or substances may be disposed of or poured into the area drains, street and/or gutter.
2. Area drains should be shielded and/or covered to ensure that construction by-products and/or chemicals are not washed into them.
3. No tools or equipment may be rinsed off on the property in a manner that causes the water to reach the area drains, street and/or gutter.
4. No unprotected stockpiling of sand, gravel, dirt or other materials in the street is permitted.
5. Any sand, gravel, dirt or other materials piled/stored on the driveway or Owner's Residential Lot must be effectively covered to prevent rain or irrigation water runoff from carrying material residue into the area drains, street and/or gutter.
6. In the event of a runoff event or spill, sandbags must be strategically placed to ensure that no substance makes its way into the area drains and/or storm drains.
7. Hoses and/or irrigation should not be allowed to run in a manner that causes water or any substance to wash into the area drains, street and/or gutter.
8. Containers for hazardous materials such as paint, concrete, chemicals, etc. must be in good condition and not allowed to spill or leak onto the ground or be washed into the area drains, street and/or gutters.
9. No products or chemicals should be buried for disposal.
10. Trash and debris should be properly contained and disposed of off-site.
11. No vehicles or equipment should be allowed to leak oil anywhere.
12. No portable restroom facility may be allowed in the street and those stored on the Owner's Residential Lot must be in proper working order so that no waste leaks.

- 13. Pesticides and/or fertilizers must be monitored and properly used and stored.
- 14. No irrigation runoff should reach the street and/or gutter, as such runoff may carry chemicals from pesticides, fertilizers, etc., into the storm drain.
- 15. Pesticides and/or fertilizers must be monitored and properly used and stored.
- 16. No irrigation runoff should reach the street and/or gutter, as such runoff may carry chemicals from pesticides, fertilizers, etc., into the storm drain.

THE BASIC GOAL IS TWO-FOLD:

- 1. No materials, other than rainwater, should be allowed to flow into the area drains and/or storm drains.
- 2. No chemicals or products should be allowed to contaminate the groundwater supply.

In addition to the foregoing, you have previously been provided with a set of educational materials attached to the Association Rules regarding best practices associated with water quality and associated issues. You should carefully review these materials and provide them to any contractors or consultants who will be performing work on your Residential Lot or who will be entering the Community at your request. As referenced above, you are responsible for any violations of Applicable Laws by such individuals or entities.

ACCEPTANCE AND ACKNOWLEDGMENT

I am the homeowner of record for the residence noted below. I have read and understand the Water Quality Management Best Management Practice Guidelines and agree to inform my contractors and consultants of same and to diligently pursue their compliance with such guidelines. I also understand my liability in the event of an infraction resulting in a fine against me and/or the Association. I understand that I will be held personally responsible for any fines and/or fees levied against me and/or the Association as a result of any infractions caused by me, my contractors or my consultants in connection with the construction, maintenance, or any other activities on my Residential Lot.

Exhibit A: Sample Landscape Plan Submittal Document

FINISH GRADING and DRAINAGE NOTE:

1. All planting areas shall have positive surface drainage of 2% minimum.
2. All finish grade work shall be maintained away from building walls.
3. All paved surfaces shall have positive surface drainage at 1% minimum to planting areas which in turn shall drain to the street in front of the house by means of sheet flow to established flow lines and/or to landscape area drains connected to the existing drainage system of PVC or ABS drain lines, as acceptable to the governing agency.

IRRIGATION NOTE:

The project landscape planting areas shall receive the following irrigation system. Low precipitation flat shock and leaf spray system automatically programmed with an electric controller. System components will include a gate valve at the point of connection, back flow device, electrically operated remote control valves, and flat spray irrigation nozzles on 12" pop-up bodies in shrub beds supplied by PVC schedule 40 mainline and lateral lines sized according to hydraulic calculations. Cuts shall be determined by solar orientation and planting area. 100% head to head coverage shall be achieved throughout the system.

GENERAL NOTES:

1. All overhead wood members shall be painted to match the unit.
2. Additional area drains shall be provided at all roof drain down spout locations.
3. Owner shall approve location of irrigation controller and valves.
4. Owner shall approve lighting fixtures and location of lighting timer.
5. Owner shall approve concrete finish and color.
6. Contractor shall review all existing site conditions prior to submitting bid and prior to commencing installation. Any discrepancies shall be brought to the immediate attention of the Owner.
7. Contractor shall verify location of all utilities prior to construction and shall be held liable for all damages incurred.
8. 1/2" Master Joints are not shown. Contractor shall make construction layout adjustments. Refer all questions to the Landscape Architect.

PRELIMINARY PLAN LIMITATIONS

1. This document is a preliminary plan and is not intended to be used for construction purposes. It is subject to change without notice.
2. The plan is based on information provided by the client and is not intended to be used for construction purposes.
3. The plan is based on information provided by the client and is not intended to be used for construction purposes.
